Professional Summary

Data Science postgraduate with hands-on experience in machine learning, statistical modelling, and cloud-based analytics. Strong technical foundation in **Python, SQL, TensorFlow, Power BI and data visualization tools**. Experienced in working with large datasets, feature engineering, and predictive modelling. Previously worked as a **Technical Analyst in IAM and SaaS** environments, bringing analytical thinking, problem-solving, and customer-centric communication. Passionate about applying AI to real-world problems and improving decision-making through data.

Core Skills

- Programming & Query Languages: Python, SQL, PySpark
- Frameworks & Libraries: Pandas, NumPy, Scikit-learn, LightGBM, XGBoost, Matplotlib, Seaborn, Flask
- Data Engineering & Analytics: Data Cleaning, Transformation, Exploratory Data Analysis (EDA), SQL-based ETL
- Visualization & BI Tools: Power BI (DAX, Data Modeling), Excel (Pivot Tables, Power Query)
- Databases: SQL Server, MySQL, PostgreSQL
- Monitoring & Scheduling Tools: Centreon, Control-M
- Version Control & Collaboration: Git, GitHub, Bitbucket, Jira
- Business & Soft Skills: Stakeholder Management, Requirement Gathering, Cross-functional Collaboration, Business Process Analysis
- Cloud & Big Data: AWS, Databricks
- Automation & Scripting: Shell scripting, Task automation

Professional Experience

Data Analyst – MuscleFood Ltd Nottingham | 2026 – Present

- Proficient in SQL programming, a solid grounding in database design principles
- Skilled in data analysis, applying statistical methods and business analysis frameworks to solve problems
- Hands-on experience building dashboards and reports in Power BI and Tableau Analytics.
- Working knowledge of R and Python for data manipulation and analysis
- Strong organisational skills, with a proven ability to manage multiple projects concurrently
- Confident communicator, able to present findings clearly to stakeholders at all levels
- Experience working with web analytics data (Google Analytics, Adobe Analytics, or similar)
- Analytical mindset with a track record of examining data critically to extract meaningful, actionable insights
- Able to translate complex findings into clear, accessible language for non-technical colleagues

Technical Analyst - IDWORKS IT Solutions Global Pvt. Ltd., India | 2022 – 2024

- Analyzed and resolved complex issues across cloud-based IAM platforms.
- Worked with API-integrated systems (Okta, Azure AD, SailPoint).
- Managed large volumes of ServiceNow data for access requests and incident workflows.
- Created structured documentation and knowledge base articles.
- Collaborated with global teams to improve process efficiency and customer experience.

Essilor Luxottica, Nottingham, UK Analyst – Warehouse Operations Jan 2025 – Sep 2025

- Extracted, cleaned, and transformed the extensive operational data sets utilizing Python, PySpark, and SQL in Databricks to facilitate detailed analysis of the inventory, shipments, and order fulfillment processes.
- Utilized the PySpark transformations and the data manipulation libraries in Python to perform the exploratory data analysis (EDA) of the data sets to identify the trends, anomalies, and operational bottlenecks.
- Designed the interactive Power BI dashboards to display the key performance indicators such as order accuracy, picking/packing efficiency, inventory turnover, and shipment delays, thereby facilitating the decision-making processes.
- Conducted the data validation and quality checks utilizing the Python and PySpark data processing workflows to ensure the accuracy of the data sets for reporting and stakeholder analysis.

Remote Tutor (Software Trainer) Theological Society of England and Wales | UK | 2025

- Delivered software training to elderly learners, simplifying technical concepts.

Projects

AI-Enhanced Machine Learning for Predicting Breast Cancer Survival

MSc Dissertation

- Building ML models using SEER Dataset to predict survival outcomes.
- Conducting exploratory data analysis, feature selection, and model tuning.
- Tools: Python, Pandas, NumPy, Scikit-Learn, TensorFlow.
- Cloud: Google Colab, AWS, Azure.

Algae Biofuel Production Analysis

- Performed process modelling and economic evaluation.
- Applied engineering design and HAZOP principles.

Education

MSc, Data Science | Nottingham Trent University, UK (Sept 2024 –December 2025) Grade: Commendation

BTech, Information Technology | Dr. Vishwanath Karad MIT World Peace University, Pune (August 2018 – September 2022) CGPA: 8.7 / 10

Certifications

- Python for Everybody – Coursera
- Engineering Project Management – Rice University
- Pyramid Analytics -Model, Present, Visual
